Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

**A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.**

Among the measurable goals for this MCM is the number of people clearing debris and brush within the City, the number of people who worked and how many hours they worked, plus the amount of debris/brush removed and properly disposed of.

**B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.**

The amount of Earth Day Clean Up litter that the City of Syracuse Department of Public Works brought into the Onondaga County Resource Recovery Agency was 11,260 pounds. It is noted that Earth Day Clean Up litter weight could very well be more as other departments may have picked up some litter, households may have disposed of theirs with their regular trash, or businesses may have put some in their own dumpsters. The City had 6,500 people hours cleaning up. (Next page)

**B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable**

**Goal.**

The **Adopt-a-Block** program, in coordination with the **Onondaga County Save the Rain Connect the Drops** program, makes city beautification a yearlong, citywide effort. Individuals, organizations, schools, and businesses volunteer to take responsibility for at least two city blocks, committing to a monthly cleanup of a designated area and "on the spot" litter pickup, as necessary.

<http://syrgov.net/cleanupcuse.aspx>

The Clean-Up 'Cuse Adopt-a-Block program supports Onondaga County's efforts to keep litter out of sewer systems and ultimately Onondaga Lake. County Executive announced the Save the Rain & Connect the Drops program as part of an initiative between the county and OCRRA, which promotes the reduction of litter in the county and specifically aims to block trash from entering the community's waterways.

The annual Onondaga Creek Clean Up has about 200 people hours removing trash and invasive plants from the shoreline of Onondaga Creek. They remove about two large dumpsters of this material.

**7. Evaluating Progress Toward Measurable Goals MCM 6**

Use this page to report on your progress and project plans toward achieving measurable goals identified in your Stormwater Management Program Plan (SWMPP), including requirements in Part III.C.1. Submit additional pages as needed.

**A. Briefly summarize the Measurable Goal identified in the SWMPP in this reporting period.**

Measurable goals for this MCM include the number of catch basins cleaned and the amount of debris gathered. The miles of streets swept and the amount of debris removed; the amount of material removed from the oil/water separators at the DPW Garage and the amount of yard waste picked up and disposed of.

**B. Briefly summarize the observations that indicated the overall effectiveness of this Measurable Goal.**

2,450 catch basins were calculated to be cleaned in the past year (2,200 the previous year). The repair or replacement of 173 catch basins and 12 manholes took place (7 the previous year). Approximately 5,700 cubic yards of yard waste were picked up and composted. Street sweeping removed over 760 tons of debris from the city streets. Numbers were calculated as 20% of numbers City wide since it is estimated 20% of sewers are storms. No material was removed from DPW's oil/water separators.

**C. How many times was this observation measured or evaluated in this reporting period?**

			1
--	--	--	---

(ex.: samples/participants/events)

**D. Has your MS4 made progress toward this measurable goal during this reporting period?**

Yes  No

**E. Is your MS4 on schedule to meet the deadline set forth in the SWMPP?**

Yes  No

**F. Briefly summarize the stormwater activities planned to meet the goals of this MCM during the next reporting cycle (including an implementation schedule).**

Continue current programs, performance of self assessments as time allows, tracking of repair or replacement of catch basins and manholes. Efforts will be made to get more accurate data that applies only to the storm sewersheds as opposed to historically reporting the data available across the whole City and applying a percentage to total numbers.
