Negative Declaration Exhibit A

Criteria for Determining Significance

As proposed, the reasonably anticipated environmental effects of the aforementioned 400 South Salina Street, LLC project will not be significant. This conclusion results from the thorough evaluation of the Project's attributes and their environmental effects against the criteria provided in NYSDEC regulations at 6 NYCRR §617 et. seq. A summary of this evaluation follows.

Determination of Environmental Significance

To determine whether the Project may have a significant effect on the environment, the impacts that may be reasonably expected to result from the proposed Project must be compared to criteria specified in NYSDEC regulations. (6 NYCRR §617.7). These criteria are considered indicators of significant effects on the environment.

Criterion 1

A substantial adverse change in existing a) air quality; b) ground or surface water quality or quantity; c) traffic levels; d) noise levels; e) a substantial increase in solid waste production; f) a substantial increase in potential for erosion, flooding, leaching or drainage problems.

a) Air quality

The Project primarily involves the acquisition, renovation, reconstruction and equipping of the Facility and will result in physical improvements to the interior and exterior of the Facility. The Project may involve the potential for minor, temporary changes in air quality in the area immediately surrounding the site during the period of renovation and construction. Any potentially hazardous materials located on-site, such as lead-based materials, will be removed from the Facility prior to their renovation and reconstruction and disposed of in accordance with all local, state and federal laws, thereby reducing the potential for such materials to become airborne and migrate off-site. Further, the Company and its contractors will take all necessary measures to mitigate any short-term renovation and construction-related impacts (i.e., keeping windows closed as much as possible during renovation and reconstruction activities, using proper ventilation equipment, limiting the use of dumpsters and dump trucks for construction debris, watering construction debris to reduce dust and prevent airborne migration, etc.).

b) Ground or surface water quality or quantity

The Project is located in an urban area and involves the renovation of existing improvements and impervious surfaces. As such, the Project is not expected to result in an adverse change in ground or surface water quality or quantity.

c) Traffic levels

The Project is intended to attract new visitors to the Project Facility. A Traffic Impact Assessment, dated September 7, 2016, was prepared by GTS Consulting for the Project. According to that report, the development is anticipated to result in a minor increase of 20 vehicles or less entering and exiting during peak hours. The level of impact on the areas evaluated will depend on the amount of traffic that uses valet parking versus parking directly in the parking garage. Traffic counts should be monitored further following completion of the Project to assess the level of impact. If necessary, potential impacts can be mitigated through the use of striping and signal timing improvements.

d) Noise levels

The Project may involve the potential for minor, temporary changes in noise quality due to typical construction-related activities. However, any such impacts to noise quality will be mitigated to the extent possible by using appropriate mufflers on heavy equipment and restricting construction hours (*e.g.*, 7:00 a.m. to 5:00 p.m. from Monday through Friday). Accordingly, the Agency determines that any noise-related impacts associated with the Project will be insignificant.

e) Substantial increase in solid waste production

The Project will result in the generation of solid waste, but such waste will be disposed of by a licensed contractor at an existing solid waste facility in accordance with applicable laws and regulations. As such, the Agency does not anticipate any adverse impacts associated with solid waste production.

f) Substantial increase in potential for erosion, flooding, leaching or drainage problems

The Project is located in an urban area and primarily involves the renovation of existing improvements and impervious surfaces. As such, the Project is not expected to result in an increase in the potential for erosion, flooding, leaching or drainage problems.

Criterion 2

The removal or destruction of large quantities of vegetation or fauna; substantial interference with the movement of any resident or migratory fish or wildlife species; impacts on a significant habitat area; substantial adverse effects on a threatened or endangered species of animal or plant, or the habitat of such a species; or other significant adverse effects to natural resources.

As noted above, the Project site consists of an improved parcel in an urban setting, and the Project will result in physical improvements to the interior and exterior of the Project Facility. Therefore, the Project will not have any impact on vegetation or fauna, the movement of any fish or wildlife species, or other natural resources. No known significant habitat areas

have been identified, and there are no known threatened or endangered species of plants or animals in the immediate vicinity of the Project area.

Criterion 3

The encouraging or attracting of a large number of people to a place or places for more than a few days, compared to the number of people who would come to such place absent the action.

The Project involves the construction and operation of an extended stay hotel and is therefore intended to attract people to the Facility and the downtown area. Given the proposed size of the Facility (*i.e.*, 120 rooms), the City's population will not increase significantly.

Criterion 4

The creation of a material conflict with a community's current plans or goals as officially approved or adopted.

The Project is consistent with the Agency's goal of effectuating financial assistance for specific projects located within the City of Syracuse, as well as the City's desire to revitalize the downtown area.

Criterion 5

The impairment of the character or quality of important historical, archaeological, architectural or aesthetic resources or of existing community or neighborhood character.

The Project Facility is located within the South Salina Street Downtown Historic District. The Project involves both exterior and interior renovations to the Project Facility, which are intended to revitalize the Facility and return it to productive use while further enhancing and taking advantage of the ongoing development in the downtown area. The Project is anticipated to improve the character and quality of the surrounding area and therefore is not expected to adversely impact existing resources in the area, many of which have undergone similar renovation efforts in the recent past.

Criterion 6

A major change in the use of either the quantity or type of energy.

The Project is not anticipated to result in a major change in the quantity or type of energy used so as to require extraordinary services or actions on the part of energy providers.

Criterion 7

The creation of a hazard to human health.

Two or more related actions undertaken, funded or approved by an agency, none of which has or would have a significant effect on the environment, but when considered cumulatively would meet one or more of the criteria in this section.

This criterion deals with the issue of cumulative impacts of multiple actions under SEQRA. No cumulative impacts have been identified and none are expected.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project : _____
 Date : _____

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency and the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer "Yes" to a numbered question, please complete all the questions that follow in that section.
- If you answer "No" to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box "Moderate to large impact may occur."
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the "whole action".
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

See attached.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information related project materials

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the Syracuse Industrial Development Agency as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.
